Name: Double Island Station - Continuous			
Size: NTS	Part Number: 2141-96	Drawn By: Eng	
Prepared Date: 5/8/20	Revision Date: Date	Revision Number: Rev #	Sheet: 1 of 2

The electrician is responsible for connecting power to the fourplex outlets up from the floor along the indicated path. Provide a 20 amp, switched outlet for each student station (four per double island).

Electrical connections may be made as long as the stub outs fall within the footprint of the base platform. However, some minor modifications may be necessary. Also, electrical power may be ran through the platform bases of adjacent stations.

The island includes 20 amp fourplex outlets mounted below the countertop on both ends of the lower columns. The tools plug into these outlets.
