The electrician is responsible for connecting power to the fourplex outlets up from the floor or down from the ceiling along the indicated path. Provide a 20 amp, switched outlet for each student station (six per hex station).

Electrical connections may be made as long as the stub outs fall within the footprint of However. some minor modifications may be necessary. Also, electrical power may be ran through the platform bases of adjacent stations.

The guad island includes 20 amp fourplex outlets mounted below the mirror on all six faces of the station. The tools plug into these outlets.
