Sheet

This item is attached to the wall with wood screws. 3" wood screws and decorative washers are provided for wood framed walls. Fasteners for other wall types are to be obtained locally. Screw through the back panel in locations which will be inconspicuous after installation. Suggested locations include: under shelves, behind drawers, and locations hidden by products or supplies.

Attach mirror panel by fastening through the pre-drilled holes with the provided connector bolts. These bolts will thread into a factory installed threaded fastener.

Mirrors are provided with mirror clips and wood screws. Attach one mirror clip at each corner approximately 2" in from the vertical edge. Two different sizes of screws are provided: 3/4" screws for attaching the mirror to wood cabinet components and 1" screws for going through gypsum board into a wood framed stud wall. Fasteners for attaching mirrors to other wall types are to be provided by the installer.
