PROPER PLACEMENT OF #8282 MAGNUM-XL ELECTRIC SHAMPOO CHAIR:

1. Locate the furnished plumb line (string with weight) included.
2. Drape the string over the center of the shampoo bowl neckrest, letting the weighted end drop to the floor. Mark the point where the string touches the floor.
3. Position the chair 2" forward of the mark, moving away from the bowl.
4. Align the center of the chair. Left to right, with the center of the bowl.
5. This is the recommended placement of the chair.
6. Experiment with placement of chair by moving forward (or backward) as much as an inch, depending on the type and shape of the bowl.

ELECTRICAL HOOKUP INSTRUCTIONS:

1. Locate power cord at the back of the chair near the floor.
 2. Safely route electrical cord under cabinet, floor, or threshold to prevent a person from tripping.
 3. Plug the AC adapter into a 110 volt GFI electrical outlet with more than 10 amps service
 4. A ground-fault-interrupt outlet is recommended and may be required by local electrical codes.
